

why Slice ceramics?

sliceTM

award winning cutting tools

replacing metal with Slice ceramics

companies world-wide are switching to Slice ceramics*

endless applications

- corrugated
- nuclear and oil industry
- paper converters and slabbing
- shrink wrapping and labels
- remove flash from plastic
- laboratory and forensics
- automotive
- high-wear, high-rust & combustible environments
- electrical
- clean room
- military
- police
- bomb-squads
- mining
- aerospace
- and more

up to
10x
longer lasting
vs. steel

patented ceramic blades

- stays sharp up to 10x longer than steel
- never rusts
- non-corrosive, chemically inert
- withstands heat up to 1600F
- non-conductive, non-sparking
- no oil coatings like metal blades
- less blade changes = less injuries = less down time

up to
10x
longer lasting
vs. steel
™

reduce injuries | save money

- thicker than metal
- easier & safer to handle

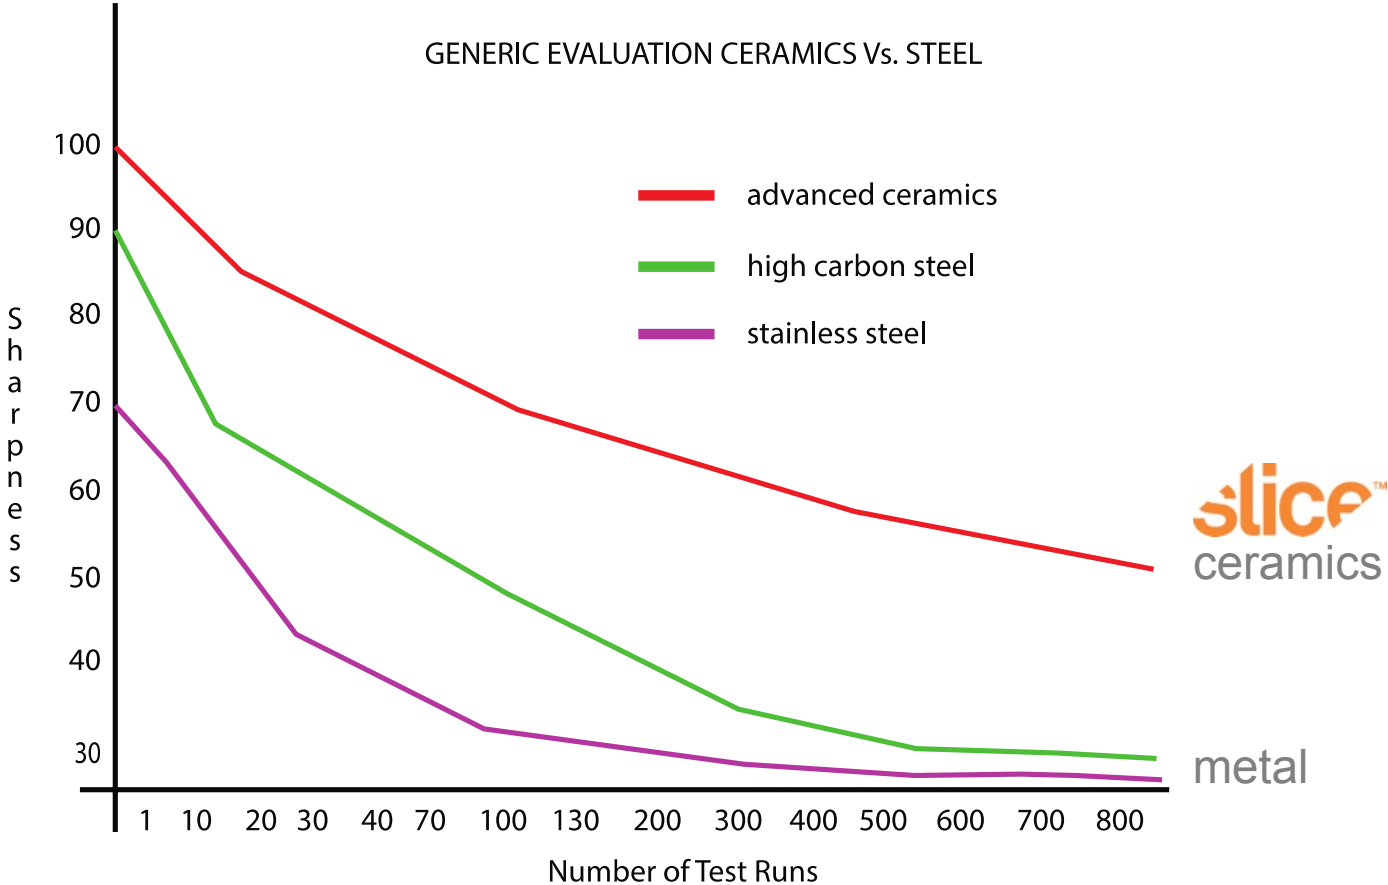

safer rounded edges

- patent-pending thicker blades
- easier & safer to handle vs. metal
- strong and durable
- safer rounded edges
- double sided
- single Slice ceramic blade is equivalent to up to 20 single-edge metal blades
- made from pure Zirconium Oxide ZrO₂
- only diamonds are harder

up to
10x
longer lasting
vs. steel
TM

our ceramics outlast steel

source : Slice, Inc. internal lab testing on customized sharpness testing machine. Each blade was held against a pile of paper by a given force with repetitive cutting to demonstrate ceramic blades are more durable and stay sharper for longer than metal.

the un-sharp blade™

safer & easier to hold & use vs standard metal blades

Slice ceramic technology

- safe + clean made from 100% Zirconium Oxide
- patented thicker design easier to hold and handle
- 1.5mm thick vs. 0.6mm standard metal
- stays sharp up to 10x longer vs. steel
- less blade changes
- a safer cutting experience

conventional steel blades

- dull & rust quickly
- dull blades require excessive force
- dangerous and uncontrolled cutting
- results in millions of hospital visits a year

less blade = less injuries

max corrugated wall thickness

double 1/4" - 6.35 mm

single 3/16" - 4.76 mm

max Slice blade depth

up to 5/16" - 8.00 mm

98% of all corrugated is double-walled or single walled

95% of all products in the US are shipped in corrugated boxes

less blade change

a single Slice ceramic blade is equivalent up to 10 high-end double-sided metal blades or up to 20 high-end single sided metal blades

- reduces the high risk activity of blade change by up to 20x
- less chance of injury
- less productivity downtime saves time and money
- less blade usage saves money

welcome to the family

full line of award-winning versatile handles to safely meet diverse cutting needs

10503 auto-retractable
10400 manual 3-position

00116 precision cutter

10514 mini cutter

00200 safety cutter

10512 pen cutter
10513 manual pen cutter

box cutter : sku 10503 & 10400

patented j-hook handle adds multiple safety benefits

reddot design award

up to
10x
longer lasting
vs. steel
TM

slice™

safer cutting

cleaner + safer cuts

conventional box cutter

- inconsistent cuts
- irregular depths
- exposed fist & fingers
- susceptible to staples, sharp edges, etc.

Slice box cutter

- clean, controlled cuts
- hands protected
- self-guiding
- requires less energy
- reduces fatigue
- safer

hook it – outside not inside

- available in auto-retractable sku#10503 or 3-position manual sku#10400
- use #10404 replacement blades
- designed to stay OUT of your pocket
- utility knives INSIDE pockets cause millions of accidental lacerations every year
- always accessible
- quickly & easily add your own lanyard

pen style cutter : sku 10512 & 10513

convenient size with powerful safer cutting

mini cutter : sku 10514

convenient size with powerful safer cutting

auto-retractable slider
button with rubberized
comfort grip

built-in magnet

lanyard hole

includes one
#10404
ceramic blade
with rounded tip
for added safety
(replaceable)

easy no-tool
blade change

up to
10x
longer lasting
vs. steel
TM

precision cutter : sku 00116

micro-ceramic blade replaces dangerous craft knives and blades

Good Design
award winner

up to
10x
longer lasting
vs. steel

TM

replaces dangerous craft knives

- safer than traditional craft knives
- non-replaceable blade = no blade changes
- ambidextrous non-slip finish
- safe micro-ceramic blade **stays SHARP**
- less blades, less money, less injuries
- ceramic micro-blade never rusts

safety cutter : sku 00200

#1 seller with tens of millions sold worldwide to reduce injuries

- finger-friendly™
- embedded non-replaceable micro-ceramic blade
- ambidextrous non-slip finish
- never rusts
- built-in magnet + key-ring hole
- long lasting micro-ceramic blade **stays sharp**
- safely clips, cuts, and opens boxes
- less blades, less money, less injuries

non-slip
rubberized
finish

1000's of different uses : opening cartons, stretch & shrink film, plastic, labels, paper, paper-mill rolls, bag opening, and more.

replacement blades : sku 10404

patent-pending Slice ceramic blades : easier & safer to handle

saves time & money | reduces injuries

- patent-pending thicker blades
- easier & safer to handle vs. metal
- strong and durable
- safer rounded edges
- double sided
- made from pure Zirconium Oxide ZrO₂
- only diamonds are harder
- less blade changes = less injuries = less down time
- **4-pack equivalent up to ~80 high end metal blades**

replaceable Slice ceramic blade fits the following products

10400 manual 3-position

10503 auto-retract

10512 pen cutter
auto-retract

10513 pen cutter
manual

10514 mini cutter

up to
10x
longer lasting
vs. steel
